2011 Population and Housing Census Final Results

The first census in the Turkish Republic of Northern Cyprus was carried out on 15 December 1996. 10 years after the realization of this census, the Council of Ministers decided to meet the needs of rapidly developing countries and to carry out censuses in 10-year periods, as the United Nations deems appropriate. A new Population and Housing Census was made on the same day. Following the 2006 Census, it was decided to conduct a new census on 04 December 2011 with the recommendation of the United Nations and its decision with the number K(II)977-2011 and dated 17.8.2011.

Population and Housing Counts, population and residences basis
These are studies that provide detailed regional information about their qualifications.

Aim : The size of the population within our borders on the census day, whose permanent residence addresses are in the TRNC even if they are not within the census day borders, and who have been abroad for a short time (less than one year), their distribution according to administrative division, demographic, social and economic characteristics, as well as household characteristics. It is to determine exactly information such as labor force, employment and unemployment, migration and migration reason, disability status, and building and housing properties.

Scope : All the de-jure (permanently resident) population in our country on the census day, the population residing abroad but within our borders on the census day, and the population residing in our country but located abroad on the census day are within the scope of the census.

Definition : The 2011 Population and Housing Census was carried out both de-facto and de-jure. On the census day, people were counted wherever they were. With the questions in the questionnaire, permanent residence addresses of all individuals were questioned and de-jure (permanently resident) and de facto population were determined according to their settlements.

Dejure Population: It is the population determined on the basis of the permanent residence of the person who is being censused within the borders of the TRNC.

Defacto Population: At the time of the census within the borders of the TRNC, the person It is the population determined by the place where it is (or counted) located.

The census carried out in 2011 was carried out within the scope of the full census in our country, as in all countries. In the census, the Recommendations Text developed jointly by the United Nations and the European Union for the censuses to be made in the EU countries have been fully implemented. However, the only difference between the practice in our country and many other countries is that the census is started and completed in one day with the implementation of the curfew. In many countries, address-based census is carried out due to the appropriate address infrastructures.

While countries publish data on their populations, data are published according to the United Nations recommendation 'Permanent Residence Address'. While determining the permanent residence address of an individual, regardless of his nationality and reason for being in our country, if he intends to live in our country for one year or more, this individual is registered in our country's population. For this reason, while foreign students and workers who study in our country and aim to live in our country for one year or more, take their place in our country's population, while our students or other citizens who intend to go abroad for education and stay in the countries they visit for one year or more are included in the dejured population of the country they are in.

Therefore, with the census figures on December 4, 2011, Administrative figures may differ.

2011 Population and Housing Census Final Results

Initial data on the final results of the 2011 Population and Housing Census, 17 December 2012 In the second stage, it was announced that the details of gender, nationality (nationality) and place of birth would be shared with the public.

The data prepared for the second stage consists of the following tables with their details;

The distribution of the permanent resident (de-jure) population in the TRNC by District and Gender is given in Table 1;

The distribution of the permanent resident (de-jure) population in the TRNC by District, Subdistrict and Gender Table 2 shows;

De-jure population in the TRNC, District, Sub-district, Municipality and The distribution by gender is in Table 3;

The permanent resident (de-jure) population in the TRNC, District, Subdistrict, Municipality, Distribution by Neighborhood and Gender is in Table 4;

The permanent resident (de-jure) population in the TRNC, District, Subdistrict, Municipality, Comparison with the 2006 Census on the basis of Neighborhood and Gender Table 5 shows;

The distribution of the permanent resident (de-jure) population in the TRNC on the basis of District, Gender and Nationality (nationality) is given in Table 6;

The population of TRNC citizens permanently residing in the TRNC (de-jure), District and The distribution by gender is in Table 7;

De-jure population of TRNC, Place of Birth, Permanent Residence Distribution on the basis of Location and Gender is in Table 8;

Population of TRNC Citizen permanently residing in the TRNC (de-jure), Place of Birth, Distribution by Permanent Residence and Gender is given in Table 9.

The conclusions that can be drawn from the general evaluation of the data, the details of which will be seen in the tables, can be summarized as follows. The de-jure population in our country was announced as 286,257. According to the data explained in Table 1, it was determined that **150,483 (52.6 %) of this population was male and 135,774 (47.4%) was female.**

In our districts, this distribution was realized as follows.

Of the population of 94,824 people in Nicosia, 49,838 (52.6%) are Male, 44,986 (47.4%) are female.

Of the population of 69,741 people in Famagusta, 36,742 (52.7%) are Male, 32,999 (47.3%) are female.

Of the population of 69,163 people in Girne district, 36,718 (53.1%) are Male, and 32,445 (46.9%) are female.

15,661 (52.1%) of the population of 30,037 people in Güzelyurt are Male, 14,376 (47.9%) are female.

Of the 22,492 population in the Iskele district, 11,524 (51.2%) are male, and 10,968 (48.8%) are female.

In Table 4 and Table 5, the Neighborhood populations in the municipalities affiliated to our Districts are shown. Looking at the tables, while population increases in some developing regions, there has been a decrease in population in some regions. Looking at Table 5, some regions with population growth in the period from 2006 to 2011 are as follows; In Nicosia Municipality, in Hamitköy District, in Famagusta Municipality in Çanakkale District, in Girne Municipality in Karakum District, in Güzelyurt Municipality in Kalkanlıy District and in ýskele Municipality, in Ötüken District.

Again, according to the same tables, the highest decrease was observed in Haydarpaşa District of Nicosia Municipality, Suriçi District of Famagusta Municipality, Lala Mustafa Paşa District of Güzelyurt Municipality and Boýaz District of Iskele Municipality. According to the analysis studies, it has been determined that the regions with population growth are those that are in the new construction phase.

When we look at the analysis studies, it has been experienced that the immigrant population, especially from foreign countries, has returned to their countries in the regions where there has been a great population decline.

According to Table 6 , **the total number of TRNC citizens** declaring that they are single or dual nationals in the de-jure population table it was determined that the total number of TRNC citizens was 184,414, while the number of TRNC citizens born in Turkey was 3,691.

According to Table 8, the number of people born in Cyprus (TRNC and Southern Cyprus) permanently residing in our country is 160,207. This figure constitutes 56.0% of the population permanently residing in Cyprus. Again, according to the same table, the number of people born in Turkey permanently residing in the TRNC is 104,641. This figure constitutes 36.6% of the population permanently residing in Cyprus.

According to Table 9, the total number of Cyprus-born (TRNC and Southern Cyprus) TRNC citizens permanently residing in the TRNC is 153,374. This figure constitutes 80.5% of the TRNC citizens permanently residing in Cyprus. Again, according to the same table, it is seen that there are 31,234 Turkish-born TRNC citizens permanently residing in the TRNC. This figure constitutes 16.4% of the TRNC citizens permanently residing in Cyprus.
